Nano-Check™

AMI Cardiac Panel

Why Nano-Check™ AMI test is selected

- One Step Procedure
- Small volume of sample requirement (80ul)
- Multiple markers in a single strip covers the time spectrum of AMI presentation
- Uses plasma, serum or whole blood samples
- Result in 10-15 minutes with high accuracy
- Qualitative and quantitative assay in conjunction with Nano-Checker 710 Reader
- Lowest Detection limit of TnI in Immunochromatography Test (0.2ng/ml)

Product Specification

Technology	Immunochromatography
Turn Around Time	15 minutes
Sample Type	Whole Blood, Plasma and Serum
Storage	Room temperature (2-30°C)
Shelf Life	15 months
Package	20 test/box
Kits Contents	20 Tests, 20 Micro Pipettes, 1 Instruction Manual

Nano-Check™ AMI Product Ordering Information

CARDIAC MARKERS					
Catalog No.	Product Name	Specimen	Target	Format	Test/Box
CD301S	Nano-Check™ AMI 3 in 1	Plasma/Serum	TnI/CK-MB/Myo	Cassette	20
CD201S	Nano-Check™ AMI 2 in 1	Plasma/Serum	TnI/ Myo	Cassette	20
CD7141	Nano-Check™ AMI cTnI	Plasma/Serum	cTnI	Cassette	20
*CD302P	Nano-Check™ AMI 3 in 1	Whole Blood/Plasma/Serum	TnI/CK-MB/Myo	Cassette	20
*CD202P	Nano-Check™ AMI 2 in 1	Whole Blood/Plasma/Serum	TnI/ Myo	Cassette	20
*CD7140	Nano-Check™ AMI cTnI	Whole Blood/Plasma/Serum	cTnI	Cassette	20
